

Sophos Mobile

Improve productivity with simpler Unified Endpoint Management

Sophos Mobile is a Unified Endpoint Management (UEM) and Mobile Threat Defense (MTD) solution that helps businesses spend less time and effort to manage and secure traditional and mobile endpoints. The only UEM solution that integrates natively with a leading next-gen endpoint security platform, Sophos Mobile manages and secures iOS, Android, Chrome OS, Windows 10 and macOS devices.

Highlights

- ▶ Comprehensive UEM solution
- ▶ Manage iOS and Android smartphones and tablets
- ▶ Manage Windows 10, Chrome Books and macOS computers
- ▶ Manage through Sophos Central
- ▶ Sophos Container for email, documents, and web content
- ▶ Manage and configure Microsoft Office 365 apps on iOS and Android devices
- ▶ Manage the full device for corporate devices or just the Sophos Container for BYOD devices
- ▶ Extensive support for Android zero touch and Apple DEP
- ▶ Flexible self-service portal
- ▶ Award-winning protection

Simple Unified Endpoint Management

Manage and secure corporate-owned or personal Windows 10, macOS, and mobile endpoints in one system to ensure a simpler management strategy, ensuring uniform company security policies and secure access to company assets. For maximum productivity, organizations where BYOD is embraced can apply consistent policies regardless of device type or ownership. And, because everything we do at Sophos is about security, Sophos Mobile will keep business data, users, and their mobile devices protected and secure.

Modern Management with Mobile Threat Defense

Establish a robust line of defense at the mobile device level with industry leading threat protection technology that leverages deep learning technology and web protection in the Sophos Intercept X for Mobile app. Enforce company policies with compliance checks that will automatically restrict access to business resources or initiate remediating actions in case of violations. For additional security, Sophos Mobile integrates natively with the leading next-gen endpoint protection solution for Windows and macOS in Sophos Central.

Keep business data protected and personal data private

Keeping business data protected and secure on personal or company-owned mobile devices is critical. To make sure that business data is safe and personal information is private, Sophos Mobile comes with a container for email and documents that can be deployed either with or without management of the device itself. Container-only management gives admins control over corporate content without intruding on the users' privacy, ideal in BYOD scenarios.

Remote configuration and setup

Spend less time managing and securing traditional and mobile endpoints for increased productivity, and rest easier knowing that the associated risks are reduced. Configure BYOD or corporate-owned Android, iOS, Chrome OS, Windows 10 or macOS endpoints remotely with a powerful selection of policies, profiles, and configuration options. Reduce your help desk calls by helping your users help themselves with the flexible self-service portal, entirely without IT involvement.

Productivity - Let your users work on any device they want

Sophos Mobile enables companies to improve productivity by letting employees use mobile devices for work. A wide range of security and management capabilities ensures that company data is secure, for example by configuring access to business information and email on personal or business-owned mobile devices.

Security – For users, data, and devices

Sophos Mobile is the only Unified Endpoint Management product that integrates natively with a leading next-gen endpoint security platform, protecting users on traditional and mobile endpoints. Keep business email and documents on mobile devices in containers, making sure that access to company data is controlled and secure, even for users

Unified Endpoint Management Highlights

Devices

- ▶ iOS, Android, Chrome OS, Windows 10, and macOS
- ▶ Configuration and policies
- ▶ Inventory and asset management
- ▶ Reporting

Apps

- ▶ Install, remove, and view apps
- ▶ Enterprise licensing via Apple VPP
- ▶ App control, whitelist/blacklist
- ▶ Manage and configure Office 365 apps

Powerful Containers

Ensure sensitive company information on mobile devices stays safe and separated from personal data on the device with the secure and AES-256 encrypted Sophos Container. Easy-to-use apps for iOS and Android let users access containerized content: Sophos Secure Email for email, contacts, and calendars, and Sophos Secure Workspace for documents and corporate web browsing.

with personal devices that can have access to business information without intrusions upon their privacy. Leading mobile threat defense technology protects users from malicious apps and websites.

Simplicity – Easy to configure, manage, and maintain

Sophos Mobile lets you get started in minutes as a hosted solution in Sophos Central. The intuitive admin workflow, together with the flexible self-service portal, means your admins will spend less time on the day-to-day tasks of securing and managing traditional and mobile endpoints, leading to a lower total cost of ownership.

Sophos Mobile can also be used to manage and configure the Microsoft Office 365 apps on mobile devices. Admins will save time by using a single console, making policy creation and distribution simple in the Sophos Mobile admin interface.

Value – Secure your mobile devices affordably

Sophos Mobile is licensed per user and delivers great value, enabling companies to manage and secure the devices of the whole organization without overspending on underutilized features.

Content

- ▶ Email and document container
- ▶ Publish content
- ▶ Container-only management
- ▶ Native OS containerization

Security

- ▶ Compliance rules and remediation
- ▶ Deep learning powered malware protection
- ▶ Web protection
- ▶ MitM network protection

Manage mobile content without managing devices

Container-only Management gives admins control of corporate content in the Sophos Secure Workspace and Sophos Secure Email apps without requiring management of the mobile device itself. This is ideal in Bring Your Own Device (BYOD) scenarios, when corporate email and data can be protected and controlled without intruding on the users' privacy.

Sophos Secure Email

Sophos Secure Email is a fully-featured, secure, and containerized personal information management (PIM) app for Android and iOS that lets you isolate information like business email, calendars, and contacts from private data on the mobile device. Easily revoke business access based on device compliance rules.

Highlights:

- Native email experience
- Containerized business email ideal for BYOD devices
- Easily and consistently configure secure email across different OS versions
- Anti-phishing technology protects users from malicious links hiding in emails or content
- Email attachments open within the secure container remain encrypted
- Control data leaving the container (e.g., restrict copy and paste, open with, etc.)

Sophos Secure Workspace

Sophos Secure Workspace is a containerized mobile content management app for iOS and Android that provides a secure way to manage, distribute, and edit business documents and view web content. Edit Office format documents without leaving the container environment to ensure encrypted content remains secure.

Highlights:

- Documents are stored securely with AES-256 encryption
- Distribute files to devices from the central admin interface
- Anti-phishing technology protects users from malicious links in documents
- View and edit text, compressed archives, PDF, and Office format documents
- Corporate Browser for secure access to intranets or corporate websites

Sophos Intercept X for Mobile

The Intercept X for Mobile app gives you device, network, and app security for your Android, and iOS devices without compromising performance or battery life. Powered by Sophos's deep learning based anti-malware technology, Intercept X for Mobile offers an award-winning level of antivirus and ransomware protection together with potentially unwanted app detection on Android devices. Man-in-the-Middle threat detection, web protection, web filtering for unwanted content, and much more on Android and iOS. For Chromebook users, Sophos Chrome Security protects users from unsuitable web content, malicious websites, and unwanted extensions.

Intercept X for Mobile monitors device health continuously to ensure that you are notified if a device is compromised and can take remediating action or automatically revoke access to corporate resources. Additionally, Sophos Intercept X for Mobile for iOS and Android includes a Password Safe, Secure QR Code Scanner, and Authenticator for one-time passwords.

Highlights*:

- Security for Android, iOS and Chrome OS devices
- Protection from malicious apps, ransomware, spam, potentially unwanted apps (PUA), and low-reputation apps on Android using Intercept X deep learning technology
- Deploy using Sophos Mobile or third-party UEM products
- Comprehensive Man-in-the-Middle (MitM) threat detection
- Microsoft Intune integration for conditional access
- Web filtering for unwanted content
- Privacy Advisor
- Secure QR code scanner
- Authenticator for one-time passwords
- Password Safe
